Susceptibility to Disease Of several persons who have been equally exposed to chilly weather one takes a fatal cold, while the others are wholly unaffected. When scarlet fever or diphtheria enters a family it is a rare thing for all the members to be attacked. The great majority escaped la grippe during its late prevalence. And the same is true of epidemics of every kind

The Dominic Didn't Sing It. There is a big Baptist church, colored, out in the northwestern part of the city. A man standing at the intersection of Vermont avenue and T street might hit it with a stone without overserting himself. The pastor of that church is a good deal of a vocalist, and nothing pleases his congregation more than his excellent renditions of gospel hymns. There was a meeting in that church one evening, and everything was moving along very pleasantly when the paster said: "Now, we are going to take up-a collection, and if the amount donated is satisfactorily large I will sing for yousing anything you ask for."

The congregation then shelled out its contribution. It must have been "estis-factorily large," for the pastor stapped to the front and said: "I'll sing now. What shall it be? Express your profer-
